

# ThetaTeeth

Theta Teeth is a collection  
of 3232 NFTs

Multiple traits with  
references to Theta community

Tiered selling model with a  
'cashback'

Pre-sale for Discord members

Advertising rollout to  
boost secondary market

Members only events

Future projects' airdrops for  
ThetaTeeth holders

Exclusive ThetaTeeth apparel  
for the owners

Expansion into metaverse

Built on Theta blockchain

With fast and cheap  
transactions

Welcoming and friendly  
community

"Life is short, so smile while you still have teeth"

# ThetaTeeth minting

ThetaTeeth will be sold in tiers. When each tier is sold out it will be celebrated with airdrops and giveaways. We know that this has been done by many NFT launches before and we want to bring something new to reward our participants. Early tiers' participants will get a 'cashback' from the sell out of the consecutive tiers. For example, those holding a Tier 1 NFT, will get a cashback from sell out of tiers 2-5, but the holders of Tier 4 NFT will only get cashback from sell out of Tier 5. We didn't forget about Tier 5 NFT holders and to reward them the airdrops are going to be the sweetest ones for them.

Venn Diagram on the left shows how cashback will be distributed throughout the tiers. Those who get in early will benefit the most earning the cashback from selling out NFTs in all consecutive tiers.

## Why Teeth?

In ancient times hunters used to wear teeth as a token or pendant around their necks or wrists.

Nowadays, we don't really mind our own teeth until they start causing problems. Some people neglect them, others use them to express themselves. One thing we at ThetaTeeth know for sure - teeth is what we all have in common as well as our love for Theta blockchain. We want to share our love and introduce Theta blockchain and its community to people in crypto space. **It's important to stay safe in crypto environment** important to look after your teeth, so, this two things are going to come along nicely in our journey.

ThetaTeeth is a pilot project of a recently founded studio SkeletonArts. **The main goal is to create a community** that can enjoy art created by the like-minded people. Moreover, our members will be able to take part in the art creation process in our future projects. And we already have 2 in mind!

## Who are we?

SkeletonArts started as a group of enthusiasts and big Theta fans! 2 friends gathered a group of 11 people together that includes artists, blockchain and smart contract specialists.

Our first project ThetaTeeth is going to include **3232 unique NFTs** with references to the culture of Theta blockchain and its community.

3232 NFTs are going to be released in multiple stages and each stage will be celebrated with giveaways, airdrops and other perks that we will announce later on (something to keep an eye on!).

Our marketing campaign is going to target people outside of Theta community to encourage more individuals to **learn about Theta** as well as to work with the existing community. This will not only involve interactions in Twitter and Discord, but also Medium articles.

## Future plans

We are currently looking at developing and implementation of two more projects that are already heavily in the works (mostly outsourced task by task, so our team can fully focus on the current matters). Members of the ThetaTeeth would enjoy the benefits of the upcoming projects' **airdrops, hefty discounts and limited information access.**

Our team is also negotiating some collaborations with other NFT projects (cannot reveal at this stage).

Since the value of an NFT in secondary market is derived from demand and potential for future growth, our aim is to focus these heavily after the acquisition becomes possible. The former will be achieved via a separate budget (including profit re-investment) for marketing which is derived solely for the purpose of **increasing the awareness**, as well as to push the floor price higher and keep an increased demand. The latter will be achieved via granting access to various 'closed society' features, collaborations and real-world use including collaborations with metaverses and apparel.

## Why choose us?

The simple answer is that all members of our team are truly enthusiastic about NFTs, crypto-world in general and Theta network in particular. This project does not aim to obtain an arbitrary wealth status for the developers, but rather to become a token of actual content, value generation for the holders and a home to 'cool things'! Whilst many think of the roadmap for a single project, we plan out the next 2-3 projects and how they would interact with each other for the holders' benefit.

**Come get your Tooth!**
